DETAILED ACTION

Drawings

1. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In ¶ 11, line 18, "T_r" has been replaced by --T_T--.

Allowable Subject Matter

3. Claim(s) 1-12 is/are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art:

4. IDS document Dooley, do(es) not teach or make obvious the following limitation(s):

With regard to claim 1: a measurement device for receiving the signals from the first signal sources to determine the position P and a time of measurement when the measurement device receives the first signals and for, based on the time of measurement, measuring a receiving time (T_R) of a predetermined event of the second signals.

With regard to claim 2: a measurement device associated with each second signal source for receiving the signals from the first signal sources to determine the position P and a time of measurement when the measurement device receives the first signals and for, based on the time of measurement, measuring a receiving time T_R of a predetermined event of the second signals.

5. Syrjarinne and Soliman, do(es) not teach or make obvious the following limitation(s):

a control device for determining a signal propagation time (t) between the measurement device and one of the second signal sources by calculating a relative distance |P-Q| between the measurement device and the one second signal source

Art Unit: 3662

based on the position P measured by the measurement device and a position (Q) of the one second signal source and by dividing the resulting distance by the signal propagation speed, and for determining a time T_T at which the one second signal source originates the predetermined event by solving $T_R - t$.

6. King, do(es) not teach or make obvious the following limitation(s):

With regard to claim 1: wherein the positioning terminal uses the time T_T as a reference to receive the signals from the first signal sources for positioning.

With regard to claim 2: a measurement device associated with each second signal source for receiving the signals from the first signal sources to determine the position P and a time of measurement when the measurement device receives the first signals and for, based on the time of measurement, measuring a receiving time T_R of a predetermined event of the second signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
